

Become an electrician

Earn money and get a qualification at the same time!

Learn multiple skills in one apprenticeship.

Our electrical apprentices are responsible for installing, maintaining and troubleshooting electrical wiring systems. You will find yourself working in homes, commercial or industrial buildings, and even machines and large pieces of equipment.

How long is an electrical apprenticeship?

Electrical apprenticeships are 3-4 years in length (6,000-8,000 hours of practical work experience).

Includes a combination of:

- On-job work experience - we match you with a host business
- Off-job block courses - theory and training courses through a training provider

**At the end of
your apprenticeship you will be a
qualified tradesperson with a recognised Level 4
qualification ready to enter into a long term career in the trades!**

The Apprenticeship Training Trust (ATT).

ATT provides opportunities for New Zealanders to train and become successful tradespeople. We're an independent non-profit Trust here to help you step up into a career with long term prospects. We partner with trade businesses who host you during your apprenticeship, while our Area Managers support and mentor you right through until you qualify.

What's in it for me?

- Job security
- Support/mentoring from ATT
- All training courses organised
- Tool allowance and interest free tool loan
- Ready to start with standard PPE gear provided

What do I need to apply?

- NCEA Level 2 or above
- New Zealand citizen/permanent resident
- Current full/restricted licence
- Pass a drug and alcohol test
- No criminal background
- A CV with two references
